Small Earthquakes Near the Salton Sea in Southern California

- Following a swarm of recent small magnitude earthquakes that began on Monday near the Salton Sea in Southern California, the Director of the Governor's Office of Emergency Services reminded local emergency managers and the public to be prepared for the potential of similar or larger earthquakes over the next week.
- "California is earthquake country. We must always be prepared and not let our guard down," said Director Mark Ghilarducci. "The threat of an earthquake on the San Andreas Fault hasn't gone away, so this is another important opportunity for us to revisit our emergency plans and learn what steps you need to take if a significant earthquake hits."
- This reminder comes just a few weeks before the Great Shakeout, a nationwide earthquake preparedness drill on 10/20/16.
- Ghilarducci asked the California Earthquake Prediction Evaluation Council (CEPEC) to convene on Tuesday morning to discuss and evaluate a sequence of small earthquakes that have occurred about 10 kilometers southwest of Bombay Beach, Salton Sea area. CEPEC is a committee of earthquake experts that reviews potentially credible earthquake forecasts and advises the Director using their best judgement.
- The council concluded that stresses associated with this recent earthquake swarm may slightly increase the probability between 0.03 percent and 1.0 percent of an additional earthquake as large, or larger, than the 09/26/16 magnitude 4.3 occurring over the next week. Although this increased probability is relatively small, Ghilarducci stressed that it's always important for officials and the public to take steps to prepare.
- On Tuesday afternoon, Cal OES held a conference call with emergency managers in eight Southern California counties to discuss this recent swarm of earthquakes and ensure that local emergency plans and preparedness education remains a priority. He reminded them of the important earthquake response and recovery planning work that has been done over the years, including earthquake plans in Northern and Southern California and the Cascadia Subduction Zone–Earthquake and Tsunami Plan along the north coast.

2016 Haitian Entrants Support

Cal OES State Operations Center (SOC) is partially activated in support of this event.

Haitian Entrants, San Ysidro, San Diego County

- Between the two shelters (National City Armory and El Cajon Armory) the shelter counts reported on 09/28/16 were:
 - National City Armory – 2 persons (-27)
 - El Cajon Armory – 80 persons (-5)
 - Christ Ministry Center – All entrants (with the exception of pregnant women and their families) were transferred to the El Cajon Armory.
 - Best Western Hotel San Diego – 16 (pregnant women and their families)

Non Governmental Organizations

- The Alliance San Diego and Christ Ministry Center continue to coordinate shelter activities at the El Cajon Armory.
- Renovations and cleaning are currently being done at the Christ Ministry Center and when they are completed, the church will only be accepting a total of 24 entrants at a time (with pregnant women and families being the priority).
- Catholic Charities continues to help Entrant's book plain tickets to resettle to their final destinations.
- The Catholic Charities will be switching the focus to locating affordable housing for those who are staying in San Diego and who have been deemed eligible for federal funding via Wilson/Fish and/or CHEP.
- The American Red Cross (ARC) continues to provide technical and material support.
- ARC is picking up the materials at the National City Armory on 09/28/16.

State agencies currently supporting the sheltering operations are as follows:

California Department of Social Services (CDSS):

- CDSS issued a one-time augmentation of \$1.3 million of Refugee Social Services (RSS) funding provided by ORR and can be used for transitional housing assistance and transportation. Of the \$1.3 million:
 - \$334,224 to San Diego County Health and Human Services Agency
 - \$128,764 to and Catholic Charities/Wilson Fish
- CDSS Disaster Services Bureau (DSB) reached out to its feeding partners, Southern Baptist Disaster Relief and The Salvation Army. Both organizations have the capacity for providing feeding services. However, if services are requested, funding will need to be coordinated.
- DSB has made several attempts to contact the San Diego Food banks to find out if they are able to provide food for feeding operations, however there has been no response to date.
- DSB continues to work with our Emergency Food Assistance Program (EFAP) to research commodities programs.

2016 Haitian Entrants Support

State agencies currently supporting the sheltering operations are as follows:

Cal Volunteers:

- By close of business on 09/28/16, the National City Armory will end its shelter operations. The Armory remains available for use until the 10/03/16 end date.
- The three (3) CA AmeriCorps Disaster Team members at the National City Armory has packed remaining food and supplies for transport to either the El Cajon Armory or Christ Ministry Church.
- Seven (7) ambassadors from the LDS Church volunteered and cleaned the bathrooms, kitchen, drill floor and outdoor area.
- Four (4) Spanish speaking translators have arrived at the El Cajon Armory on 09/28/16.
- There are currently three (3) Creole translators from J/P HRO.
- CV and AmeriCorps Disaster Team members plan to demobilize on 10/02/16.

California Department of Public Health (CDPH):

- CDPH ORH contacted the County on the Zika testing for the pregnant women. CDPH is awaiting information from the County.

California Department of Food and Agriculture (CDFA):

- Continuing to monitor the situation.

California National Guard (CNG):

- All entrants at the National City Armory have been transferred to the El Cajon Armory. Volunteers cleaned the armory and all materials have been removed.

Per CNG, the plan is to demobilize both armories on 10/04/16 at 0800 hours.

- The California National Guard (CNG) is mission tasked to stand up two Armories for shelter.

San Diego County

- Public Health Staff and Eligibility workers continue to visit the El Cajon armory Monday, Wednesday and Friday's from 0800 hours to 1200 hours.

WEATHER SYNOPSIS BY REGION

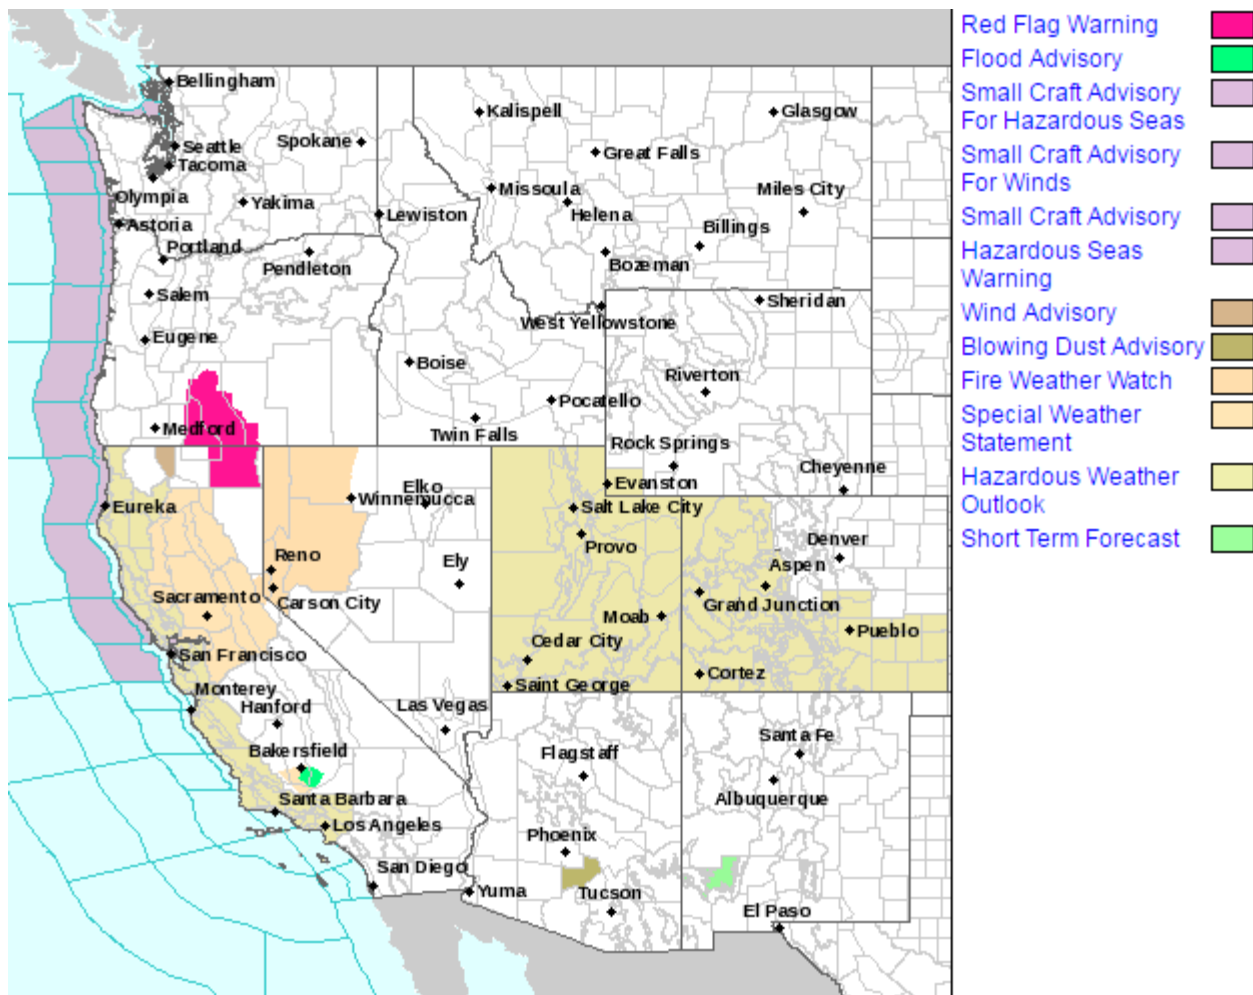

NORTHERN CALIFORNIA

The high pressure ridge that has been over the region is weakening as a low pressure trough approaches from the north. This trough will be the dominant weather feature through early next week. Afternoon temperatures will be 4-7 degrees above normal today, and southwest winds will develop this afternoon in response to the incoming trough. Subtropical moisture moving northward through Southern California will likely reach the Central Sierra late today, but the adjacent portion of the region will only see a few afternoon cumulus. As the trough strengthens offshore on Thursday the resulting southwest flow will push the subtropical moisture off to the east. Southwest winds will increase across the will region through Saturday. Southwesterly gusts along and east of the Cascade-Sierra crest will reach 30 mph Thursday, 40 mph and locally higher Friday, and 35 mph early afternoon on Saturday before shifting to lighter westerly winds after a front passes through. Humidity will be 15-30% there each afternoon. Friday is considered the only High Risk day due to the stronger winds. Temperatures will drop to near normal on Thursday then remain 8-12 degrees below normal into next week. There is a slight chance of light rain showers in far northwest California Friday night, and a slight chance of light rain in Del Norte, Humboldt, western Siskiyou, and western Trinity counties on Saturday. More widespread light to briefly moderate precipitation is possible over mid and upper elevations across the entire region late Sunday and Monday, with lower elevations receiving scattered light amounts even as far south as the Bay Area. Far northwestern California may see 1-2 inches of rainfall from this system. Snow levels could drop as low as 5000 feet in the north and 6000 feet in the south late Sunday and Monday. Spotty showers will likely continue on Tuesday, followed by high pressure Wednesday and Thursday.

SOUTHERN CALIFORNIA

A southerly feed of subtropical moisture will allow isolated showers and thunderstorms to develop over many mountainous areas today. Most of the storms will remain near the Sierra Crest and across the highest elevations of Southern California. An increase in surface dew points has occurred and most of the storms should produce some rainfall. High temperatures today will be 5-8 degrees cooler with highs in the 70s along the coast and in the mountains to the lower to mid 90s in the valleys. Winds will be light. Thursday, look for another 5 degrees of cooling to occur. Only a handful of storms should occur Thursday and they will be limited to the Sierras and the deserts and no further thunderstorm activity is expected through the period. A deep trough will slowly approach the area late this week into the weekend. This trough will produce breezy conditions as well as much cooler weather Friday into the weekend. By Saturday and Sunday, expect valley high temperatures to only be in the upper 70s to lower 80s. It will turn breezy each afternoon Saturday through next Tuesday in and near the deserts...especially in the Kern County Mountains and Banning Pass. It will also be windy in the Sierras where wind gusts to 40 mph will be possible Saturday into early next week. The trough may bring some light precipitation to areas from Yosemite National Park northward Sunday night into Monday, but most of the precipitation will remain north of the area. Relatively cool weather will persist through next Monday before warmer weather arrives by the middle of next week. No offshore winds are expected during the next 7 days.
